August Ahmed

Boston, MA | 781-856-4818 | augustahmed5678@gmail.com | LinkedIn | GitHub | Personal Website

EDUCATION

Boston University, College of Arts and Sciences **May 2027**

B.A. in Mathematics and Computer Science, Minor in Economics

- **GPA:** 3.9
- **Coursework:** Distributed Systems, Database Systems, Software Engineering, Algorithms, Computer Systems, Programming Languages, Mathematical Statistics

WORK EXPERIENCE

State Street | Charles River Development **Jun 2026 - Aug 2026**

Software Engineer Intern *Burlington, MA*

- Engineered reusable AI agent skills to convert internal documentation into structured knowledge base files, reducing token usage by up to 50% through the use of modular Python workflows
- Developed a three-agent pipeline to analyze C# test suites, identify reusable test entry points, and assess test coverage
- Implemented a RAG-powered AI agent using vector search and iterative query refinement, enabling engineers to generate new test cases using internal documentation
- Automated API testing workflows using BEATS, an in-house Cucumber-based framework, contributing to the automated test suite

PROJECTS

MailPilot | Go, React, TypeScript, Rust, SQLite, ONNX | Repository **Sep 2026 - Oct 2026**

- Engineered a Gmail desktop application using React, TypeScript, Rust, and Go, featuring secure OAuth authentication, local storage, and incremental email synchronization
- Designed a hybrid search engine combining MiniLM embeddings, ONNX Runtime, and keyword retrieval, identifying 95% of relevant emails within the top 10 results during evaluation
- Integrated semantic email classification, phishing risk detection, and RAG-powered question answering with source citations to streamline inbox management

Aurelius | Go, JavaScript, Transformers | Repository **May 2026 - Jul 2026**

- Built a configurable math focused transformer training pipeline from scratch in Go, implementing optimization, learning-rate scheduling, and checkpointing
- Developed synthetic math training datasets and achieved 90% accuracy on training prompts spanning arithmetic through derivatives
- Created a hybrid inference system combining trained models with deterministic solvers to validate mathematical outputs

OpenShed | React Native, Expo, Spring Boot, Supabase **Jan 2026 - May 2026**

- Collaborated on a full-stack marketplace for peer-to-peer tool borrowing and repair services using React Native and Spring Boot
- Built a messaging system with persistent conversations, REST APIs, participant authorization, and user blocking
- Designed a transaction-verified review system with eligibility checks, rating aggregation, and mobile submission workflows

SKILLS

Languages: Java, Python, Go, SQL, TypeScript, C, JavaScript, Rust, R
Frameworks: Spring Boot, React Native, Node.js, Expo, Cucumber, React, Tauri
Tools & Platforms: Git, Docker, Linux, PostgreSQL, Supabase, GitHub Copilot, Jira, ONNX Runtime

LEADERSHIP EXPERIENCE

Theta Chi Fraternity **Jan 2024 - Dec 2024**

Recruitment Chair

- Led strategic outreach, digital marketing, and twelve recruitment events, increasing chapter membership by 35%
